

DEAR MAMÍ,
YOU WERE A
TRAILBLAZER...

A CHEMIST WHEN IT WAS NEARLY "IMPOSSIBLE"
FOR A
WOMAN IN
COLOMBIA. BUT OH, HOW
I WISH WE HADN'T MISSED THAT
"LITTLE LUMP."

ALWAYS
IN MY HEART,
LILI

**YOUR LOVED ONES NEED YOU. THAT'S WHY
REGULAR CANCER SCREENING IS SO IMPORTANT.**
Don't wait to get screened. It may help save your life.

This is a real story and an original portrait of Lili's mother, created in her memory by artist Brit Sigh.

Visit LoveYouGetScreened.com today to learn when and
where to get screened and explore free or low-cost options

DO YOU HAVE QUESTIONS ABOUT CANCER SCREENING?

Below are answers to some common questions. Don't hesitate to talk to a healthcare professional about screening.

What is cancer screening, and why is it so important?

- Cancer screening refers to tests and exams used to find cancer in people who don't have symptoms.¹ Regular screening increases the chance of finding certain cancers early — when they may be easier to treat.²
- Finding cancer early through screening may reduce deaths from breast, cervical, colorectal (cancer of the colon and rectum), and lung cancers.¹

When should I get screened for cancer?

- Screening schedules can be different for everyone because they are based on your age and personal risk factors (for example, your family history, race, or smoking history).¹ It's important to talk to a healthcare professional about what's right for you.

How and where can I get screened?

- If you have a doctor (or healthcare facility you visit), talk to them about which screenings you need and when and where you should schedule them.
- If you don't have a doctor, you may be able to get screened at a health center near you or a mobile screening van, with or without insurance coverage. Learn more about how to get screened and find a health center at the website address below.

Is screening affordable?

- Free or low-cost screening options may be available to you, even if you don't have insurance. Explore possible options, including government screening programs, at the website address below.
- If you do have insurance, most health plans cover preventive services such as cancer screenings.

DID YOU KNOW THAT 1 IN 3 BLACK WOMEN AND 1 IN 3 HISPANIC WOMEN DEVELOP CANCER IN THEIR LIFETIME?^{2,3}
